

شركة النموذج المحدودة
ALNMOTHJ COMPANY LIMITED

Company Profile

شركة النموذج المحدودة ALNMOTHJ COMPANY LIMITED

We are an approved contractor for the (Qiddiya Investment Company,
Red Sea Global, NEOM and Diriyah Gate Development Authority)

About Us

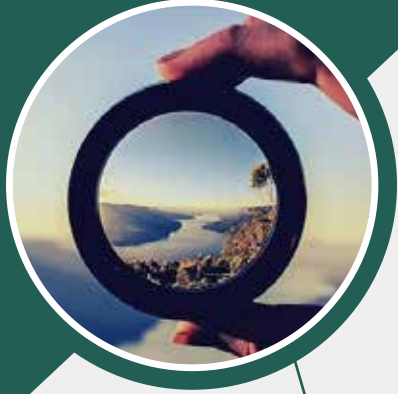

Alnmothj is a dynamic and growing group with a diversity of operations and activities. Our activities are focused on the development and utilization of resources and operations in order to yield benefits to the community and sustainable growth.

As the world enters an era where resources, services, and other basic needs for continuity and sustainable development must be carefully planned, utilized and consumed, it is important that global standards and requirements in the management of resources are implemented. A promising future, where communities can grow, develop and succeed within a nurturing and supporting environment, are core values for Alnmothj.

In order to accommodate these needs and requirements, Alnmothj focuses on national and community-centric development, and the efficient utilization and management of resources and services. Specifically, Alnmothj focuses and excels in projects related to Operations & Management, Contracting Services, Real Estate Planning and Development, through Investment Technology that facilitates everyday life, as well as medical and health care projects that contribute to better health for our communities.

At Alnmothj, we believe that it is important to alleviate and improve how things are done and which cover all aspects of the community and the people in general, establishing a flourishing and promising lifestyle, which in turn will lead to better personal productivity, benefits, and thus a contribution back to that community and the country.

We are certified aramco vendor number 10068153

Our Vision

To exceed the expectations of our customers in quality, timely delivery and cost effectiveness through continuous improvement and customer interactions.

Our Mission

To provide Construction, Engineering and Industrial solutions to all industries and technical societies mainly, Petrochemicals, Oil & Gas, Refineries and power generation .

Values

Our work ethics revolve around following values:

- ✓ Acceptance & Development
- ✓ Availability
- ✓ Customer Satisfaction & Exceed Expectations
- ✓ Integrity in our work

HVAC Solutions Trading

Alnmothj Duct Fabrication Workshop is a division of Fabrication Services of the Alnmothj

Alnmothj Duct Fabrication Workshop has more than 8 years of experience in the HVAC industry for manufacturing various types of HVAC air movement products.

Alnmothj Duct Fabrication Workshop has a reputation for consistent high-quality work, precise delivery scheduling and moderate pricing.

Our activities excellence in performance without compromising the Health and Safety of its manpower and environment.

We are willing to make available HVAC duct specialist knowledge on all aspects and can assist contractors for specific ducting requirements.

At presently we represents majority of HVAC contractors in the region by constant delivery and service of excellent products.

Fire Fighting Trading

Capabilities and Certification

- UL certified NOVEC 1230 Filling Station
- FM200 and CO2 Filling Station
- FACP fabrication, testing and conducting Pre-FAT & FAT
- Fabrication of Pipes and skid modules for Foam, Water and Clean agent systems
- Service, maintenance and hydro-testing of Fire extinguishers and breathing apparatus

Services and Maintenance

Our personnel have the training, experience and special skills to provide you with all of the Services needed to keep your people and property safe.

Formal maintenance contracts are tailored to meet individual needs that may range from an annual service visit to permanently manned sites. Service agreements cover all types of fixed fire protection and detection systems and portable fire extinguishers. In addition, we provide system inspections, audits and status reports.

Services Provided

- Annual Maintenance contracts
- Full time site management
- 24hour call out and emergencies
- System modification and extensions
- Inspection and audits

Systems Covered

- Fire detection and alarm systems
- Fire water sprinkler and deluge spray systems
- Foam systems
- Clean agent systems
- Fire Pumps
- Fire hydrant system
- Fire extinguishers
- Gas detection system

Fire Fighting Trading

How do Firefighting Systems work?

Although many systems are in use, they are all intended to prevent fires and protect the building, its occupants, and its valuables. Typical **Alnmothj Company Limited** fire protection equipment includes a smoke detector and a sprinkler system. Smoke turns on the sprinkler system when a fire starts by sensing the smoke on sensors. The presence of water stops fire from spreading. Even though this approach is effective in those circumstances, using automatic fire suppression systems with clean agents is recommended when dealing with crucial equipment or unique threats. These devices detect and suppress fires, then totally extinguish them.

Importance of Commercial Fire fighting System

Alnmothj Company Limited commercial fire extinguishers are a crucial part of the fire safety system in your building. These fire prevention methods should always be a part of your fire safety approach. Most fire inspections also include rules for company fire extinguishers; you must have these things to pass your fire inspection. Most importantly, these extinguishers will protect your building and everyone inside in the event of a fire.

Advantages of Fire Protection Systems

One of the main benefits of **Alnmothj Company Limited** fire prevention system is that it saves money over time. For example, consider a company's manufacturing investments, information technology hardware, and infrastructure. A fire affecting corporate operations for a long time could cost the company millions. An excellent example is a machine shop that produces components, and the business would suffer significantly if the shop closed for several days or weeks due to a fire.

Equipment replacement may be required, and significant contracts could be lost. Therefore, businesses need to consider all factors when estimating the cost of a fire prevention system. Another benefit of **Alnmothj Company Limited** fire prevention systems is the automatic dispatch of emergency services. These systems will strive to quickly extinguish the fire while informing the authorities to send assistance your way.

Alnmothj Company Limited Fire Protection Services

Will the system provide you with round-the-clock detection? Once activated, does it notify the authorities? What recommendations exist for a routine equipment test or inspection? Have unanswered queries? **Alnmothj Company Limited** has got your back!

Systems for fire protection are crucial for maintaining building occupants, assets, and overall safety. A fire suppression system can be your best choice if you're trying to safeguard necessary machinery or equipment. Trust **Alnmothj Company Limited** fire protection systems if you want to ensure that your house and place of business are secure all year long. We have years of experience designing, installing, examining, and maintaining fire safety systems for homes and businesses. Our customers are spread across Saudi Arabia.

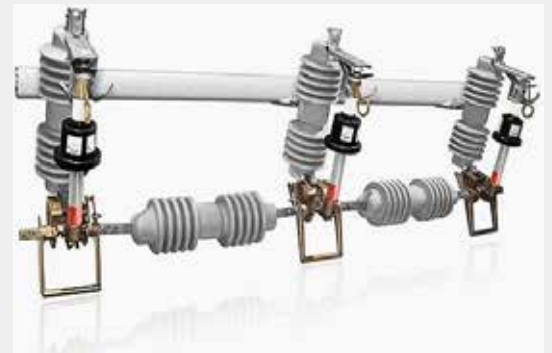

Electrical Trading and Supply

Leading trading house, is recognized as one of the most reliable distributors and retailer of Electro-Mechanical Products in Kingdom of Saudi Arabia. Serving since couple of decades with high professional personnel and quality products of economical values. Our wide range of products lineup includes Low, Medium and High Voltage Electrical Material and various Mechanical tools and equipment.

The company ethos is based on providing outstanding customer service from quotation, order and delivery to exceptional after sales support to all size customers. We have been serving the local utility, Industries and contracting companies in market impeccably. Our core client is Saudi Electricity Company for supply of distribution and transmission material, with which we are approved vendor with approved line of products.

Products

- Aluminum Name plates
- Aluminum Number Tags
- Anchor Bolts/Nut/Washer
- Auto Recloser
- Barbed Wire
- Cable Pulling Machines and accessories
- Cables
- Capacitor banks
- Current Transformers
- Cutouts
- Danger Sign Plates
- Grounding material
- Load Break Switches
- Overhead Line Accessories
- Pole Accessories
- Polymer Insulators
- Porcelain Insulators
- PVC pipes
- Scaffolding Materials
- Sectionalizer
- Spun Stressed Concrete Poles
- Steel poles
- Surge arresters
- Termination Kits
- Transformers
- Voltage Regulator
- Voltage Transformers

Solar Energy Trading

We are specialized in different field of solar-

- PV Direct system
- DC Stand Alone Systems
- Stand alone system with AC and DC loads (off grid)
- Stand Alone Systems with Back-Up Energy Source
- Grid Direct system (ON GRID)
- Grid tied with Battery back- Up systems
- Design the solar system-based on site location in PV syst software and calculating PV array sizing, MPPT selection,
- Inverter sizing, battery system sizing etc.

WHY GO SOLAR?

- It is a clean way of generating electricity.
- It is a reliable source of energy even under harsh conditions, very durable, since most solar
- modules produce electricity for 25 years or more.
- Low maintenance cost since PV system require less maintenance.
- Operates Silently.
- You can expand the system to increases and becomes power generation.

Safety Items Trading

Workplace safety is a major concern, and employers must ensure that the work environment is safe. In work-related injuries, people tend to blame the organization when a mishap occurs. Injuries at the workplace can affect both the employees and the employers. An employer's reputation will be damaged, whereas the employees will have to face serious health complications. It is one of the critical reasons why employers must provide safety products to their employees. At Alnmothj Safety, we deal with a range of safety products that will prepare you and your employees for any health risk.

Safety products that save lives

Be it eyes, hands, or ears, all our body parts are prone to different risks and injuries. In industries or workplaces where there is the use of chemicals, toxic gases, and substances, safety becomes critical. Here are the common safety products that are required at the workplace:

- ➔ Safety goggles for eye protection
- ➔ Safety footwear for footwear protection
- ➔ Eyewash stations
- ➔ Earmuffs and earphones for ear protection
- ➔ Gloves for hand protection
- ➔ Safety jackets and vests
- ➔ Arrestor and harness for fall protection

company profile - 2024

Safety Items Trading

Workplace Safety: Importance of workwear protective clothing

Here are some of the benefits of workwear protective clothing:

- Protection against injury - One of the biggest benefits of safety equipment is that they protect against injury. Wearing appropriate safety equipment minimizes the risk of injury and will keep them safe. Workers in chemical, manufacturing, construction and other industries are susceptible to different injuries. It is mandatory for them to take necessary precautions and wear the right safety equipment.
- Less sickness - In critical cases, employees take some time off work. The right workwear protective equipment will ensure that employers are safe and less sick.
- Comply with the law guidelines - The workers can even take a legal step against an employer, and you will have to provide them the compensatory pay. However, when you are taking proper measures for their safety, they won't be able to take legal action. You can prove that you were taking all the necessary measures and it is not your fault.
- Reputation - It will not only save you from paying hefty fines. But providing safety equipment will ensure that your organization's reputation is not at risk. Your business will be affected, and there are chances that employees will avoid working at your place because of the bad reputation.

Keep your employees safe and healthy

It is your legal obligation to maintain workplace safety and provide necessary safety tools to your employees. As a leading safety equipment supplier in Saudi Arabia, we're committed to delivering quality products that meet the needs of various industries. Keep your employees safe and check our wide range of safety products.

Safety is our top priority

We offer all types of safety equipment that you will need for a safe workplace. From safety gloves to earmuffs and eyewash, we stock the latest and necessary safety equipment that will prevent the risk of injuries. Provide protection to your employees and keep your operations running smoothly.

Capabilities and Certification

Video surveillance is used to protect facilities of all sizes and purposes – from residential to more complex public and industrial facilities, and the reason for the increased demand is a wide range of protective functions. In addition to its effective prevention of various crimes (burglary, theft, vandalism, fraud, terrorism), it is often integrated with other electronic security systems such as access control & fire alarm systems.

Modern CCTV systems have a wide range of features that go beyond mere video monitoring and recording. CCTV cameras have video analytics features such as ANPR, facial recognition and object classification, as well as various storage- and monitoring-related features such as cloud storage and real-time alerts.

Depending on your business requirements, the importance of these features can range from “nice to have” to “critical”. Alnmotj Company Limited team helps you to determine the camera type and what features it have depended on your facility.

CCTV benefits:

- Avoid internal and external theft
- Face recognition for easy access.
- plate recognition for car auto access.
- Crime prevention
- Evidence collection
- Staff security
- Private and sensitive area surveillance
- Customer satisfaction insurance
- Use CCTV cameras as parking management system.

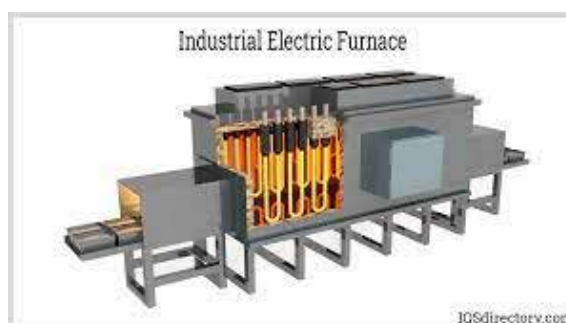

Industrial Equipment Trading

Industrial equipment varies widely, from heavy machinery in manufacturing plants to precision instruments in research laboratories. These tools are the backbone of modern industry, facilitating production processes and ensuring efficiency and quality. They encompass a spectrum of devices such as CNC machines, robotic arms, conveyor belts, and compressors, each tailored to specific tasks. CNC (Computer Numerical Control) machines, for instance, enable precise cutting, shaping, and milling of materials like metal, wood, or plastic, with unparalleled accuracy and speed. Robotic arms streamline assembly lines, executing repetitive tasks with consistency and precision, while conveyor belts transport materials seamlessly across the production floor, optimizing workflow. Compressors play a vital role in generating and regulating air or gas pressure for various industrial applications, from powering pneumatic tools to facilitating chemical processes. Despite their diversity, industrial equipment shares a common goal: to enhance productivity, minimize downtime, and uphold stringent quality standards, driving progress across sectors and economies.

Sure, here's a list of various types of industrial equipment:

1. CNC Machines (Milling machines, lathes, etc.)
2. Robotic Arms
3. Conveyor Belts
4. Compressors (Air compressors, gas compressors, etc.)
5. Generators
6. Industrial Ovens
7. Injection Molding Machines
8. Industrial Mixers
9. Packaging Machinery (Sealing machines, labeling machines, etc.)
10. Industrial Robots (Welding robots, assembly robots, etc.)
11. Material Handling Equipment (Forklifts, pallet jacks, etc.)
12. Industrial Scales
13. Industrial Dryers
14. Industrial Pumps (Centrifugal pumps, diaphragm pumps, etc.)
15. Industrial Furnaces
16. Industrial Chillers
17. Boilers
18. Dust Collectors
19. Water Treatment Systems
20. Industrial Fans and Blowers

Chemical Material Trading

Products supplies are Antifreeze & Coolant, Battery acid, distilled water, de-ionized water, cleaning products, car shampoo, heavy duty degreaser, food grade degreaser, Clornix for laundries and house hold etc.The trading division deal with export and import of many industrial chemicals to cater the need of any type of industries.

List of Industrial Chemicals

1	A COMPLETE RANGE OF LUBRICANTS	17	MONOETHYLENE GLYCOL- MEG
2	CANESEES / GEAR OIL / HYDRULIC OIL	18	MONOPROPYLENE GLYCOL- MPG
3	CUTTING OIL	19	NITRIC ACID
4	ACETIC ACID	20	NP-9
5	AMMONIA SOLUTION-25%	21	PHOSPHORIC ACID
6	ARMOHIB-28	22	RODINE-85 (31A)
7	BUTYL GLYCOL - EGMBE	23	SODA ASH
8	CAUSTIC SODA SOLUTION-49%	24	SODIUM HYPOCHLORITE
9	CAUSTIC SODA PRILLS	25	SODIUM META SILICATE
10	CITRIC ACID	26	SULPHURIC ACID
11	COCONUT DIETHANOLAMIDE	27	TOLUENE
12	DIETHYLENE GLYCOL - DEG	28	TRICHLORO ETHYLENE
13	HYDROCHLORIC ACID	29	TRIETHYLENE GLYCOL -TEG
14	ISO PROPAYL ALCOHOL - IPA	30	TRISODIUM PHOSPHATE
15	METHANOL	31	XYLENE
16	METHYLENE CHLORIDE	32	ZINC CHLORIDE SOLUTION-67%

Construction

General Construction Of Residential Buildings

We are a construction company with a nationwide reach. We offer a full spectrum of general construction services, which constitutes one of the main areas of our business. The company's potential enables us to carry out numerous projects simultaneously. We offer a range of services including general contracting of public, commercial, industrial and residential buildings as well as sports facilities. We provide comprehensive service at each stage of the construction process. We use our own technical office and suggest optimal technological solutions to our customers.

Our services are supplemented by Budimex Group companies: FBSerwis – a company offering comprehensive services in Facility Management, and Mostostal Kraków – a company specialising in constructing steel structures. General contractors primarily engaged in construction (including new work, additions, alterations, remodeling, and repair) of residential buildings other than single-family houses.

- Apartment building construction-general contractors
- Building alterations, residential: except single-family-general
- Building construction, residential: except single-family-general
- Custom builders, residential: except single-family-general contractors
- Designing and erecting, combined: residential, except single-family-
- Dormitory construction-general contractors
- Home improvements, residential: except single-family-general
- Hotel construction-general contractors
- Motel construction-general contractors
- Prefabricated building erection, residential: except
- Remodeling buildings, residential: except single-family-general
- Renovating buildings, residential: except single-family-general
- Repairing buildings, residential: except single-family-general
- Residential construction, except single-family-general contractors

Construction site preparation

Comprehensive Site Assessment:

The initial step in construction site preparation involves a comprehensive assessment and surveying process. This step gathers crucial data about the terrain, soil conditions, existing structures, utilities, and environmental factors. This information serves as the foundation for informed decision-making throughout the project.

Clearing and Demolition:

Following the site assessment, clearing and demolition activities are undertaken to remove existing structures, vegetation, and obstacles that may impede construction. This process creates a clean and safe workspace, ensuring optimal conditions for subsequent construction tasks.

Grading and Earthwork Operations:

Grading and earthwork operations are pivotal in shaping the land according to project specifications. This involves leveling, cutting, filling, and compacting the soil to achieve desired elevations and slopes. Proper grading lays the groundwork for efficient construction and effective drainage systems.

Utility Installations:

Concurrently, utility installations are planned and executed to accommodate the future infrastructure needs of the site. This includes laying down water, sewer, electrical, and communication lines, ensuring that essential utilities are in place to support ongoing construction activities.

Environmental Considerations:

Environmental considerations play a crucial role in site preparation. Measures such as erosion control, stormwater management, and protection of natural habitats are implemented to minimize environmental impact and adhere to regulatory requirements.

Adherence to Safety Protocols:

Throughout the site preparation process, strict adherence to safety protocols and regulations is paramount. This ensures the well-being of construction crews and the surrounding community, mitigating risks associated with hazardous conditions and equipment.

Setting the Stage for Construction:

Ultimately, construction site preparation sets the stage for the success of the entire project. By meticulously addressing site-specific needs and challenges, it paves the way for a smooth and efficient construction process, laying the groundwork for the realization of project goals and objectives.

SERVICES

General Construction Of Government Buildings

Alnmothj Company Limited is an “A” class engineering and construction business, pioneering in its field for over 60 years and offering comprehensive construction services via traditional or design and build procurement. We create government buildings, hotels, hospitals, office blocks, roads, utility systems and major structures.

We work in partnership with sophisticated customers who value the highest levels of quality, safety and technical expertise, in both the private and public sectors – applying our skills to meet their individual needs.

Alnmothj has the strongest, most experienced management and construction team, to which it owes its long-term and expanding success and is very proud of its growing reputation for non-confrontational contracting - a large proportion of our contracts being secured through our customers wishing to negotiate with us on an exclusive basis.

Our motto is “quality first” and thus to be able to look at our Projects in decades to come and be proud that they were built by Alnmothj.

SERVICES

Construction of prefabricated buildings on sites

Prefabrication is the process of making buildings, or components of buildings, in a different location than the job site itself. Construction companies will transport the completed unit to the final site, where they will also complete the setup and handover buildings to their new owners. This process eliminates the need for traditionally sourced construction materials because off-site assembled parts result in less waste. As the raw materials are built off-site and shipped partially assembled, prefabrication reduces the cost of labor and the cost of materials.

There is controversy regarding prefabrication because, in the past, it was a low-mass development method. Prefabrication is getting more and more relevant in the construction industry, but more significant in commercial construction. However, civil engineers use prefabrication the most because mass amounts of pre-assembled concrete and steel sections are made then transported to sites.

SERVICES

Recreation Camping

We are specialize in Tents preparing , installation, Electrical Generators supplier and operating of Generators, Arabic seat , Carpets, Electrical items suppliers such as Television, Play station 5, receiver, audio system, electrical , Air conditions and Food trucks supplier in the whole country of Saudi Arabia since a long time.

Residential and non-residential building renovations

construction, renovation and restoration of

residential buildings:

- single-dwelling buildings,
- multi-dwelling buildings (such as the two-dwelling buildings, apartment blocks, multi-storey buildings, buildings with maintained apartments etc.);
- residential buildings for specific purposes (such as homes for the elderly, students, refugee centres etc.),

SERVICES

non-residential buildings:

- hotel trade buildings (such as hotels, restaurants etc.),
- administrative and office buildings,
- commercial and other buildings for service activities,
- buildings for traffic and the performance of electrical communications (such as stations, terminals, radio and television facilities, garages etc.),
- industrial buildings, workshops, storage facilities,
- buildings of a general social character (cinemas, museums, libraries, schools, faculties, hospitals, sports halls etc.),
- agricultural buildings, and buildings for religious services.

Installation, maintenance and repair of electric, gas or oil heating systems

This class includes the installation of plumbing, heating and air-conditioning systems, including additions, alterations, maintenance and repair.

This class includes:- installation in buildings or other construction projects of:

- heating systems (electric, gas and oil)
- furnaces, cooling towers
- non-electric solar energy collectors
- plumbing and sanitary equipment
- ventilation and air-conditioning equipment and ducts
- gas fittings
- steam piping
- fire sprinkler systems
- lawn sprinkler systems- duct work installation

SERVICES

Installing, maintaining and repairing solar energy networks

Solar PV systems are very reliable – so reliable in fact, that it makes sense to have a solar panel maintenance contract.

In the business of your day to day affairs, you may just forget that they are generating free electricity. Although solar panels don't need a lot of maintenance they do need some – to make sure that they are generating at their maximum efficiency.

Your PV system may get by without inspection or maintenance, but your investment will be more likely to live up to expectations if it is regularly inspected. 1 Vision Solar offer a full inspection and testing services, ranging from a visual inspection by our trained installers to electrical tests of the circuits. Such maintenance will identify under performance issues as well as significant equipment failures. If required, 1 Vision Solar can then recommend and implement a solution.

Every system has different requirements, but here is an example of the services we offer:

Annual cleaning to keep efficiencies maximised, especially where bird soiling or atmospheric pollution has degraded the surface of the panel.

Visual inspection of all panels

Photovoltaic module string tests

Inverter system checks

Junction box, isolator, distribution board and cabling inspection

Meter check

Labelling/schematic check

Energy production analysis

Voltage and current check

Production of maintenance report

Roof condition alert

Replacement and repair of faulty items

SERVICES

Sanitary ware installation, maintenance and repair

Our expert plumbers are on hand to assist with all your plumbing maintenance, repair and installation requirements. Well designed and properly maintained plumbing and sanitary systems are very important for every villa, apartment and commercial place. Clean water flowing into the home, drainage for excess water and waste disposal are all crucial aspects of a fully functioning plumbing and sanitary system.

Whether you require a complete installation for a new plumbing system or a simple water leak repaired, our team is available to help with all your plumbing requirements and maintenance needs. Bathrooms and kitchens are key areas where you will find the majority of plumbing work. Our experienced plumbers have been trained to deal with all aspects of plumbing work throughout Dubai.

Our plumbing services cover the following areas:

- Bathroom Plumbing and Installation
- Burst Pipes
- Floods and Leaks
- Hot Water Issues
- Kitchen Plumbing and Installation
- Pipework
- Plumbing Installation and Repairs
- Sanitary Ware
- Shower Installation and Repairs
- Taps, Toilets and Showers
- Toilet Installation and Repairs
- Waste Disposals
- Water Heaters
- Water Tanks
- Water Pumps

SERVICES

Refrigeration and air conditioning systems installation, maintenance and repair

Refrigeration and air conditioning mechanics install, maintain, repair and overhaul residential central air conditioning systems, commercial and industrial refrigeration and air conditioning systems and combined heating, ventilation and cooling systems. They are employed by refrigeration and air conditioning installation contractors, various industrial settings, food wholesalers, engineering firms and retail and servicing establishments. Transport refrigeration mechanics are included in this unit group.

Illustrative example(s)

- central air conditioning mechanic
- commercial air conditioning mechanic
- heating and cooling mechanic
- heating, ventilation and air conditioning (HVAC) mechanic
- refrigeration and air conditioning mechanic apprentice
- refrigeration mechanic
- transport refrigeration mechanic

SERVICES

Gas pipe fittings, maintenance and repair

The safety, efficiency and economic viability of the oil and gas industry relies greatly on the transport and transfer of fluids from wellheads, through offshore process system piping and pipelines to refining facilities.

Regular inspection of pipeline and process pipework can uncover defects or leaks that require modification or repair.

STATS collaborate with clients to ensure the specific requirements of any replacement or repair solution are fully understood and risk assessed. Solutions are engineered to meet the exacting design and operating parameters of the system.

STATS suite of repair and maintenance solutions are engineered to suit a wide variety of applications for installation onshore, topsides or subsea. Our innovative repair and maintenance solutions enable operators to avoid or minimise shutdown time and reduce risk and expenditure.

Fire piping, maintenance and repair

Alnmothj Company Limited goes beyond installation – we take care of our customers with expert service that keeps your fire protection system in peak operating condition. Our team is available for commercial fire alarm, sprinkler and suppression system testing, repair, inspection and maintenance when you require assistance. Make your life easy: Make Alnmothj Company Limited the single source for all your fire protection needs.

We undertake inspections in accordance with all applicable codes, your insurance needs and local Authority Having Jurisdiction (AHJ) requirements. Our technicians perform weekly, monthly, quarterly and annual maintenance, depending on your needs. We boast 24/7/365 emergency repair service, NICET II and III certified inspectors, local union sprinkler fitters, and dedicated account management and recordkeeping.

SERVICES

Air conditioning and piping installation, maintenance and repair

Air conditioners have come a long way since their invention by Willis Carrier almost a century ago, and modern systems are fully capable of keeping homes cool even in the hottest summers. Of course, to keep your air conditioner running well, you'll need to have it professionally serviced. At Ambient Edge, we're proud to be your local AC installation and service experts, and we're always working to provide even more efficient cooling to our customers.

Repair and Service

AC Repair Even a well-installed air conditioner may run into trouble at any time, and those issues can be a major inconvenience for you and your family. Fortunately, at Ambient Edge, we're here to work around your busy schedule and keep your cooling system up and running no matter what. We offer flexible hours for non-emergency air conditioning repairs along with 24-hour emergency service. Our straightforward pricing system means you'll never be surprised by repair costs, and if the problem is severe enough to warrant a replacement system, we'll work with you to find the best possible fit for your family.

Installation and Sales

Heating Repair In our many years in the HVAC industry, we've noticed that two of the most common causes of air conditioning issues are over- and under-sizing. Undersized systems endure extra wear and tear as they struggle to keep the home cool, leading to a host of maintenance issues and a shorter lifespan. Things don't get much better with a system that's too large; it will constantly cycle on and off, causing uncomfortable temperature changes and wasting energy. We head off both of those problems by starting every AC installation project with a load calculation, which accounts for square footage, layout and insulation to determine your home's exact cooling needs.

Once we've helped you choose an air conditioner or heat pump that's sized precisely to meet your home's needs, our installation team will work diligently to get it up and running in your home. We know the manufacturer's specifications as well as state and local building codes inside and out, and we always treat those standards as an absolute minimum. Our goal is to set you up for high-quality, high-efficiency cooling for many years to come.

SERVICES

Painting and coating works for internal and external buildings

Painting can significantly enhance wide range of building functional characteristics. Painting offers shield from chemical attack, UV light, abrasion and other environmental factors such as extreme solar heat and moisture. Protective paint coatings are specially very effective in protecting houses. It is very important to choose exterior/interior paints that offers the level of protection anticipated.

Painting is also a quick and economical way to give your old looking home fresh and new look or to make your house more sellable/rentable if you are putting it on the market. Find out simple way of selecting perfect paint matching your requirements.

SERVICES

Installation of doors, windows, door frames, balustrades, stairs and wooden kitchens

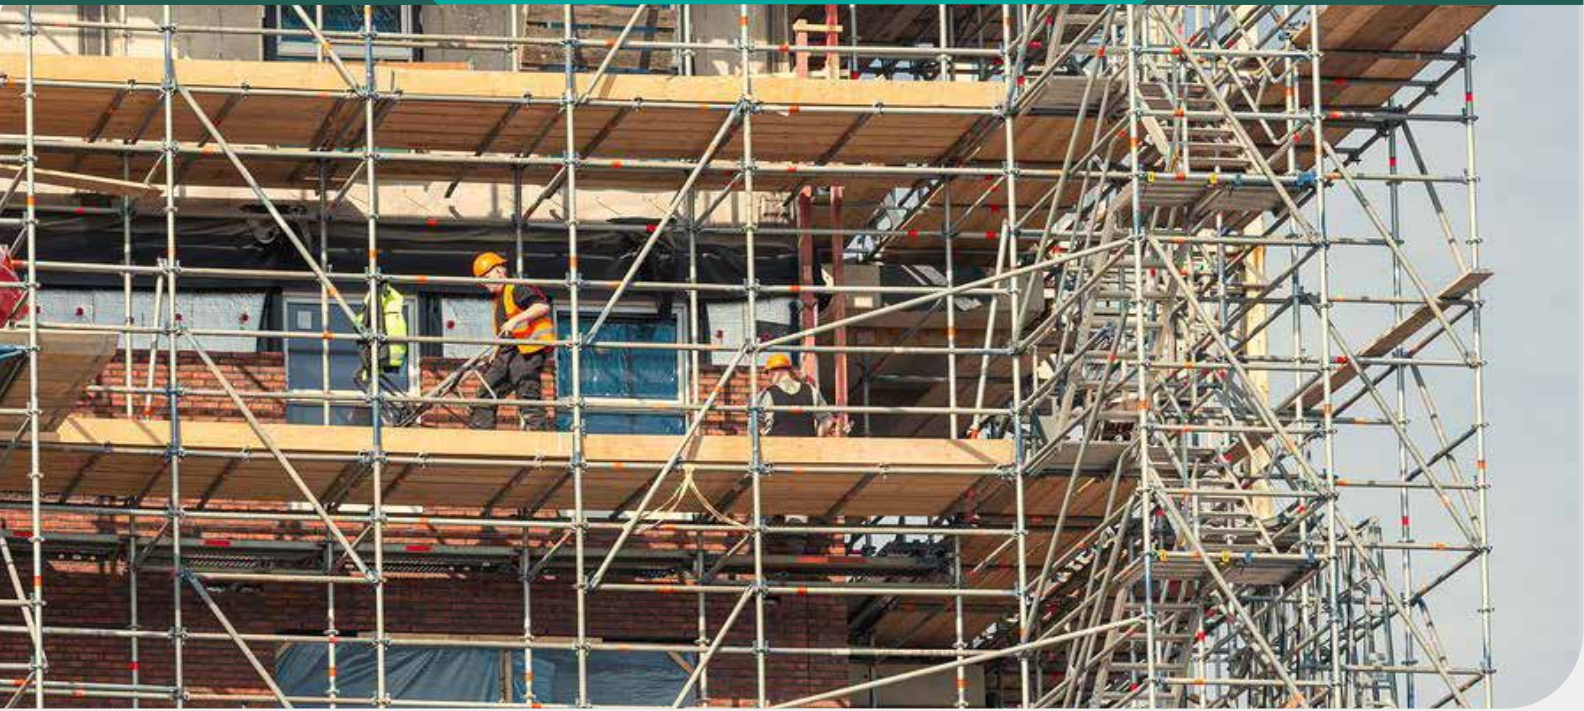

The wooden doors and windows have two main parts one is a frame, and other is the shutter. Wooden doors and windows installation require proper selection with respect to the purpose of the use, workmanship in installation, and accessories fitting. Necessary precautions or guidelines should be exercised before wooden doors and windows installation because if not done properly then it will create many problems later.

Complete the Following Points before Doors and Windows Installation:

01. Brick work should be completed first with required size of the opening before carrying out the doors and windows installation work.
02. The wood used for doors and windows frame and shutter should be free from blue stain, sapwood, decay, cracks, warping and dead knots.
03. The frame and shutter should be stocked in sufficient quantity to complete the doors and windows installation work.
04. Carpenter should have adequate tools and machinery for successful completion of the doors and windows installation work. Carpenter must have nail gun with nails, electric drill, jig saw, chainsaw, sander, jointer, planer, measure tape, plumb and marker.
04. The size of the frame and shutter should be checked, and it should be accurate according to drawing or as per design and specification requirements before carry out the doors and windows installation work.

SERVICES

Scaffolding installation works

Our scaffolding team is composed of highly trained individuals to ensure the highest quality of service. Our partners are internationally recognized by the oil and gas, petrochemical and construction industries. Our commitment to quality is proven by ISO Certification in Quality Management and now working for the ISO Certification in Environmental Management Systems. Regular compliance audit is also conducted to ensure the company adheres to industry standards.

Our scaffolding team also values its workers. Substantial investment for staff on/off the job training is made to bring continuous development and motivation. Staffs are given opportunity to enhance their technical, professional and communication skills through provision of training programs providing necessary tool, equipment and technology to carry out their roles in a professional and productive manner.

In scaffolding, safety is of high importance. Safety manual is regularly updated to adhere to changes in legislation, unique circumstances and client requirements. Safety audit are conducted on a regular basis, recording of these audits is also a must.

Our partners in scaffolding offers total package, from pre-bid until completion of the project. Both engineering and technical assistance are provided by the in-house design team. They ensure full compliance of client specifications and provide tailor-made solutions for specific projects. The team boosts in their vast knowledge and experience in the design of complex access, formwork and heavy duty support scaffolds utilizing the latest software and engineering design calculations.

Administrative and support services

Renting work berths and scaffolding (without installation and dismantling)

FOREVER SCAFFOLDING is the pioneer in the scaffolding Rental services in Saudi Arabia since more than a decade. Our scaffolding rental division in Saudi Arabia provide unmatched services for you. Whatever may be your scaffolding rental needs in Saudi Arabia or any emirates in Saudi Arabia, we have suitable solution for you. Moreover, our scaffolding hire rates in Saudi Arabia is very reasonable.

Our scaffolding Hire in Saudi Arabia covers the following varieties of scaffoldings:

- Steel Scaffolding Rental
- Rental of Mobile Aluminium Scaffolding
- Mobile steel scaffolding Rental
- Hire of Stair access Scaffolding Tower or staircase Tower
- Cuplock scaffolding on Rent.
- Hire of Scaffolding components like standards, ledgers, transom, scaffold boards..etc

We offer scaffolding rental services in a less period of time and support the best customer services. Due to this reason, we have been getting scaffolding rental orders from the same clients repeatedly since many years. Further, this clearly shows quality of our hire service and proven client's satisfaction. Moreover, we have committed and competent staff to manage the rental division.

Care and maintenance of parks and gardens for public housing purposes

For many people, outdoor green spaces play a significant role in promoting quality of life and sense of community. For example, parks serve as gathering spaces where people can meet, get active and enjoy the outdoors. Playgrounds serve as hands-on environments that stimulate childrens' minds and help them develop important life skills.

Whether your parks and playgrounds are new or well-established, a strong maintenance plan is a must. Facility managers must conduct routine inspections and perform necessary maintenance within these spaces to promote safety and minimize risk of injury to park-goers. In this blog, we reveal six of the best ways to care for and inspect your outdoor spaces and equipment to keep them in excellent condition for years to come.

SERVICES

Transformative Industries

Installing industrial equipment in industrial facilities

Alnmothj Company Limited has extensive experience in the erection and installation of industrial machinery and equipment. We begin the installation process by checking your equipment to make sure that every unit is fabricated and delivered to the site correctly before installing it at the job site. We ensure that all equipment, parts, manpower and cranes are available in the proper sequence and at the right time to keep your project on track.

Safety is vital during the erection of industrial processing plants, and our professionals know how to safely install and maintain your equipment. Prior to plant setup and industrial equipment installation, Alnmothj Company Limited develops a safety plan to ensure that all OSHA (Occupational Safety and Health Administration), MSHA (Mine Safety and Health Administration) and company safety regulations are met.

Count on Alnmothj Company Limited for expert, safe installation, modification or relocation of conveyor systems and all types heavy machinery and equipment in the mineral processing, mining, bulk material handling and related industries. Comprehensive installation services include:

- Project management
- Scheduling
- Logistics services
- Rigging, erection and alignment
- Moving and hauling
- Welding and custom fabrication
- Process piping and/or utility hookup
- Repair & Maintenance
- System testing and start-up

Other service activities

Repair, restoration and installation of home furnishings, including office furniture

At Furniture Medic, we understand the importance of making a good first impression, which is why we work hard to pay attention to the details. Our furniture repair and wood restoration services ensure that scratches, watermarks, burns and everyday wear and tear don't inhibit the appearance of your lobbies, conference rooms and offices.

Working on site and conforming to your schedule, our trained technicians utilize superior techniques and products to restore your business's fixtures and furnishings to their original beauty. Our process of using primarily low-odor water-based products causes minimal disruption to your day-to-day business.

Ask about Furniture Medic's scheduled maintenance program to ensure all wood surfaces are kept in pristine condition. You'll see a quick return to service and a more polished image of your business.

For furniture repair, wood restoration, upholstery repair, and even leather furniture repair, Furniture Medic is ready to help.

- Furniture Medic office services include:
- Onsite touch-up and repair to furniture, millwork, cabinets, moldings and interior doors
- Image enhancement to lobby areas, elevators, furniture and paneling
- Conference room table restoration
- Color-change and surface reconditioning services, using mostly water-based products
- Joint stabilization to assure structural rigidity and strength
- Minimal downtime and inconvenience
- Same-day use of most repaired or restored furniture and surfaces
